

Digitalisation of movie format

Effective from 1st Februar 2018

General Information

you have one of the following video cassettes

VCR

VHS-C/SVHS-C

BETA-Max

V2000

DVCAM

Hi8/V8

VHS/SVHS

miniDV

And would like to have these transferred to DVD in a future – proofed way.

Compatibility: We only use DVD blanks from leading manufacturers. In general, these can be played on all newer DVD-players without any problems. Please check in advanced if your player can play copied DVDs.

If nothing else is desired, you will receive a video DVD with one movie per played cassette.
For additional charge, a separation into individual sequences is also possible.

Furthermore, we provide you with the digitized films as on AVI file at a additional cost.

IMPORTANT: You are liable for the acquisition of any copyright and ancillary copyright licenses for material provided and the desired transfer!

The average processing time is 15-20 days from the receipt.

The prices are in Euro and incl.VAT additionally any transport charges.
